

Our company is based on four core values:

Our word is valuable, we engage in those things that we can meet, and fulfill those things that compromised our word.

Integrity

Quality

Every product is put through a strict and permanent high quality monitoring, under the highest standards.

We have confidence in our team and the processes that we follow. We believe in our product and our brand, and rely on a trustworthy environment.

Confidence

Teamwork

We believe that teamwork is essential both within employees, and our public outside the company.

We grow avocados with the highest technology to harvest 100% quality product, Rain forest Alliance Certified.

- Ensuring consumers a safe and quality product, agro processing adjusting by techniques such as Good Agricultural Practices
- Using quality water
- Crop management through green hedges, planting nutrition, soil analysis and leaf samples
- Application of chemical fertilizers, organic fertilizers
- Pest and disease control

The fruit is grown and harvested with all reasonable care to ensure quality

- Special seed selection
- Nurseries to control development
- Special features of irrigation, liming, pruning and weather monitoring

- Harvest control
- Avocado never touch ground
- We use proper equipment for harvest

High technology is present from planting to processing.

We grow our own plants from the seed, we collect from the area, and we process the grafting with Hass Avocado's rootstock twig.

We get our grafting from this big tree!

High Pressure Processing System

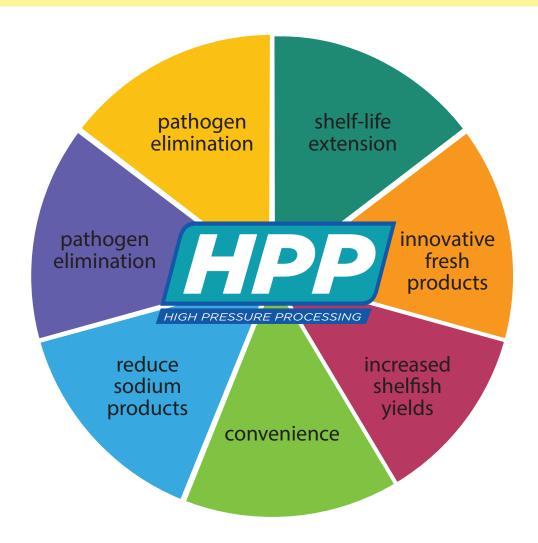

We use the HIGH PRESSURE PROCESSING technology, to provide premium quality - natural products.

High Pressure Processing System

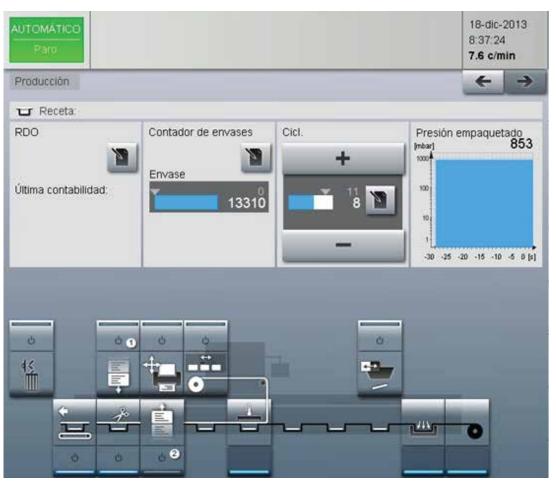

MULTIVAC

- We use a high oxygen barrier film.
- The tray type packaging makes it practical and friendly for the consumer.
- It allows an exact volume measurment.
- It's sealed in the upper part of the tray, allowing it to be easy to open.
- Allows the product to be vacuum-packed.
- Multivac permits the labeling in different sizes.
- Thermal Printing for product coding and traceability.
- Discontinuous cutting for 2 pack or 3 pack presentations.
- Out of safe packaging.

Plant Production Capacity

60 containers per year ONE SHIFT

One of our goals!

We would like to start a

strong, committed trustworthy
